

LAMCO HPL COMPACT (CGS-CGF)

Self-supporting material (from 2 mm) consisting of layers of kraft paper impregnated with thermosetting resins and an outer layer - on one or both sides - of decorative paper impregnated with aminoplastic resins; all bonded together by means of high pressure (7MPa) and heat (130°C). This material is produced in conformity to EN 438-4.

(1) Provided that the laminates are stored in the manner and conditions recommended in our Manual of technical information.

(2) Resistance to scratching is depending from finish and colour.

Note: The colour of individual lots may vary as a result of the technology and type of pigment used. Pay attention to the direction of the texture.
